EXECUTIVE SUMMARY

Aspiring Business Analyst with hands-on experience in requirements elicitation, BRD/FRD documentation, gap analysis, and stakeholder management across 4 internships and 4 live projects. Proficient in SQL, Power BI, Advanced Excel, JIRA, and Agile/Scrum/SDLC methodologies. Delivered 3+ application modules through structured requirement analysis, product design documentation, and UAT support. Certified in 13+ programs from IBM, Microsoft, Google, and Oracle, with strong analytical, data visualization, and cross-functional collaboration skills.

KEY SKILLS

- Requirements Elicitation & Analysis
- Business Requirement Documentation (BRD/FRD)
- Gap Analysis & UAT Support
- Stakeholder Communication & Management
- Data Analysis & Data Visualization
- Microsoft Excel (Advanced) | SQL | Power BI
- JIRA | Agile & Scrum | SDLC
- User Stories & Sprint Planning
- Process Improvement & Documentation
- Problem-Solving & Team Collaboration

PROFESSIONAL EXPERIENCE

Developer Intern

Mintomax Solutions, Madurai, Tamil Nadu

Dec 2025 – Jan 2026

- Gathered and documented technical requirements for 3+ application modules through structured requirements elicitation, aligning deliverables with project timelines and stakeholder expectations.
- Authored functional specifications and process documentation; conducted UAT and diagnosed application issues, improving overall product quality by resolving 10+ defects.

IoT Intern

KV Technology Services, Madurai, Tamil Nadu

Jun 2025 – Jul 2025

- Conducted requirements analysis with end-users and translated business needs into a real-time Smart Motion Detection Camera System using ESP32-CAM and PIR sensors.
- Tested and optimized system performance against defined acceptance criteria, delivering a functional, low-cost surveillance prototype ahead of schedule.

PROJECTS

UGV Rover – Defence Surveillance (Mission Rudhra X)

Team Lead, Product Designer

Feb 2026 – Jun 2026

- Led product design and functional planning for a multi-application Unmanned Ground Vehicle, documenting specifications for wireless control, sensor integration, and live-monitoring modules used in remote surveillance operations.

UAV Drone – Aerial Surveillance (Mission Garuda-X)

Team Lead, Product Designer

Jul 2026 – Sep 2026

- Led product design for a modular multi-purpose UAV enabling real-time aerial surveillance, GPS-based navigation, and environmental data collection, adaptable to mission-specific payloads across surveillance and inspection use cases.

Smart IoT Energy Meter

Mini Project

Jun 2025 – Jul 2025

- Co-led requirement analysis and functional documentation for a real-time energy monitoring system, defining acceptance criteria for sensing, cost-estimation, and data-persistence modules, validated against 5 benchmark studies.

Smart Motion Detection Camera System

Mini Project

Apr 2025 – Jul 2025

- Designed a cost-effective, automated surveillance system with real-time alerting, reducing detection latency by testing 3 sensor configurations.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

AAA College of Engineering and Technology, Virudhunagar, Tamil Nadu | CGPA: 8.04 / 10

2023-2027 (Expected)

Higher Secondary Education

SAS Techno School, Trichy, Tamil Nadu | Percentage: 70%

2021-2023
