EXECUTIVE SUMMARY

Aspiring Business Analyst with hands-on experience in requirements elicitation, BRD/FRD documentation, gap analysis, and stakeholder management across 4 internships and 4 live projects. Proficient in SQL, Power BI, Advanced Excel, JIRA, and Agile/Scrum/SDLC methodologies. Delivered 3+ application modules and 2 data-driven analytics projects through structured requirement analysis, EDA, and UAT support. Certified in 13+ programs from IBM, Microsoft, Google, and Oracle, with strong analytical, data visualization, and cross-functional collaboration skills.

KEY SKILLS

- Requirements Elicitation & Analysis
- Business Requirement Documentation (BRD/FRD)
- Gap Analysis & UAT Support
- Stakeholder Communication & Management
- Data Analysis & Data Visualization
- Microsoft Excel (Advanced) | SQL | Power BI
- JIRA | Agile & Scrum | SDLC
- User Stories & Sprint Planning
- Process Improvement & Documentation
- Problem-Solving & Team Collaboration

PROFESSIONAL EXPERIENCE

Developer Intern

Dec 2025 – Jan 2026

Mintomax Solutions, Madurai, Tamil Nadu

- Gathered and documented technical requirements for 3+ application modules through structured requirements elicitation, aligning deliverables with project timelines and stakeholder expectations.
- Authored functional specifications and process documentation; conducted UAT and diagnosed application issues, improving overall product quality by resolving 10+ defects.

IoT Intern

Jun 2025 – Jul 2025

KV Technology Services, Madurai, Tamil Nadu

- Conducted requirements analysis with end-users and translated business needs into a real-time Smart Motion Detection Camera System using ESP32-CAM and PIR sensors.
- Tested and optimized system performance against defined acceptance criteria, delivering a functional, low-cost surveillance prototype ahead of schedule.

PROJECTS

UGV Rover – Defence Surveillance (Rudhra X)

Feb 2026 – Apr 2026

Team Lead, Requirement Analysis

- Led requirement gathering and functional design for a multi-application Unmanned Ground Vehicle, documenting specifications for wireless control and live-monitoring modules used in remote surveillance operations.

Smart IoT Energy Meter

Jun 2025 – Jul 2025

Team Project (4-Member Team)

- Co-led requirement analysis and functional documentation for a real-time energy monitoring system, defining acceptance criteria for sensing, cost-estimation, and data-persistence modules, validated against 5 benchmark studies.

Netflix Data Analysis Dashboard (Python/EDA)

Apr 2024 – May 2024

Independent Project

- Conducted end-to-end exploratory data analysis to answer 5 key business questions on content distribution, genre trends, and country-wise production, delivering visual reports for data-driven content strategy.

Smart Motion Detection Camera System (IoT)

Jun 2025 – Jul 2025

Independent Project

- Designed a cost-effective, automated surveillance system with real-time alerting, reducing detection latency by testing 3 sensor configurations.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

2027 (Expected)

AAA College of Engineering and Technology, Virudhunagar, Tamil Nadu | CGPA: 8.04 / 10

Higher Secondary Education

2023

SAS Techno School, Trichy, Tamil Nadu | Percentage: 70%
